This Encyclopedia Forteana collects the literary cult hero's classic works on the unknown, the unexplained, and the unthinkable:

The Book of the Damned • New Lands • Lo! • Wild Talents

"To me no one in the world has suggested the underlying depths and mysteries and possibilities as has Fort. To me he is simply stupendous."

—THEODORE DREISER

Welcome to a record of the damned. "*By the damned*," wrote Charles Fort, "*I mean the excluded. We shall have a procession of data that Science has excluded.*"

This volume presents Fort's complete procession: four landmark books that

reinvented our understanding of the paranormal. Like no one else of his time, Fort was a genius at assembling records of bizarre, haunting, strange, and inexplicable anomalies for which science could not account. In these pages, there appear visitors from space, monsters, poltergeists, and floating islands. Frogs fall from the sky. Mysterious airships take flight in an age before the airplane. People disappear, reappear, and spontaneously combust.

The full range of Fort's investigations is presented unabridged, with a complete subject index, and a new introduction by Fort biographer Jim Steinmeyer.

Born in Albany, New York, in 1874, **CHARLES FORT** began studying anomalous phenomena in the early 1920s, tirelessly cataloging episodes of teleportation, stigmata, antigravity, spontaneous combustion, mysterious beasts, ghosts, and other sightings and events that had been written off by science. A lasting influence on the evolution of science fiction as well as on science itself, he died in 1932, in New York.
